Note: This email has the correct time and date stamp. My prior email from less than 1 hour ago accidentally had an incorrect time and date stamp.

Dear sir:

It is my sad duty to report numerous allegations spanning more than 2 years of a rampant illegal methamphetamine speed drug epidemic at the alleged FBI SID Ballston metro building in Arlington, VA, including the routine and open sale, possession, and use of illegal methamphetamine speed by Jay Pendelton, alias B2, and others at the FBI SID Ballston metro building. There have also been allegations of the sale, possession, and use of other illegal drugs, particularly nonprescription prozac. Allegations of illegal cocaine use at the FBI SID building have also been made, and Jay Pendelton gradually became honest in admitting his cocaine habits and alleging the routine distribution, possession, and use of cocaine at the FBI SID building.

The full extent of the problem is described in detail at BustJayPendelton.com. I am almost 100% certain that the alleged methamphetamine speed epidemic is in fact occurring at Jay Pendelton's workplace. However, because his work and his agency are classified or top secret in Northern Virginia, I am not certain of the exact building location. Also, while the MKULTRA-style or black ops style perps have routinely called themselves FBI SID from between 2005-2010, it is possible that workers in their classified agency might be misidentifying themselves on purpose so they can stay anonymous.

Please carefully read BustJayPendelton.com and please fulfill your legal, moral, ethical, and constitutional duties by enforcing United States drug laws at the FBI SID building.

Sincerely,

- Ed Harding
